

UI/UX System Guideline (V1 Locked)

PolarHerb.com

1. Core Design Philosophy

PolarHerb is not:

- an ecommerce website
- a biotech SaaS dashboard
- a wellness lifestyle page

PolarHerb should feel like:

An institutional intelligence interface for high-altitude botanical commercialization.

The emotional direction is:

Scientific × Mystical × Restrained × Institutional

The UI should communicate:

- evidence maturity
- commercialization readiness
- biological rarity
- scientific intelligence
- quiet confidence

NOT:

- gamification
- hype
- startup excitement

- consumer wellness branding

2. Overall Visual Language

Style Keywords

Mystic Purity
Institutional Intelligence
Scientific Restraint
High-Altitude Silence

3. Layout System

Global Canvas

Property	Value
Max Width	1440px
Main Content Width	1312px
Outer Margin	64px
Section Gap	32–44px
Module Radius	18–20px

4. Color System

Primary Background

Role	Color
Main Background	#040B11
Module Background	#071016

Role	Color
Deep Overlay	#061018

Gold System

Used for:

- structure
- hierarchy
- institutional guidance

NOT for hype.

Role	Color
Primary Gold	#D0A85C
Stroke Gold	12–24% opacity
Section Labels	62% opacity

Green System

Green ONLY means:

validated / mature / deployable

Use sparingly.

Role	Color
Validation Green	#7FAE8D

Green should NEVER dominate the page.

Neutral Text

Role	Color
Primary Text	#F3F1EA

Role	Color
Secondary Text	#D7DCE2
Muted Text	48–68% opacity

5. Typography System

Typeface

Inter

ONLY.

No serif fonts.

Typography Hierarchy

Usage	Size	Weight
Page Title	32–40	Medium
Module Title	20	Medium
Section Label	11	Medium
Metric Number	42–48	Medium
Body	12–14	Regular
Tiny Metadata	10–11	Medium

6. Stroke System

Universal Rule

Strokes should feel:

almost invisible

Usage	Opacity
Module Border	16–24%
Divider Lines	6–10%
Internal Grid	4–8%

Avoid hard visible borders.

7. Glow Rules

MOST IMPORTANT RULE

Glow is:

localized biological emphasis

NOT decorative lighting.

Allowed Glow Areas

ONLY:

- active herb node
 - selected synergy pairing
 - central biological specimen
 - subtle evidence focus
-

Forbidden Glow Areas

NO glow on:

- cards
- text
- buttons
- bars

- metrics
- frames

8. Bar / Score System

Scores should feel:

evidence-weighted

NOT:

gamified

Correct Bar Style

Property	Value
Height	10–12px
Radius	3
Segment Gap	6px
Glow	NONE

Correct Evidence Mapping

Confidence	Color
Very Strong	Green
Strong	Muted Green
Moderate	Gold
Emerging	Neutral

9. CTA Philosophy

CTAs should feel:

research gateway

NOT:

buy now

CTA Rules

Property	Value
Height	56
Radius	16
Fill	Gold at 78%
Shadow	NONE

Avoid:

- gradients
- glow
- oversized buttons
- conversion-heavy language

10. Module Design Philosophy

Every module should answer:

What commercialization intelligence does **this** section provide?

NOT:

What decorative **UI** can we add?

11. Atlas UX Principles

The Atlas should feel:

Intelligent

- structured
- weighted
- evidence-based

Calm

- breathable spacing
- restrained contrast
- soft hierarchy

Scientific

- precise alignment
- modular systems
- systematic repetition

Rare

- biological emphasis
- atmospheric darkness
- museum-grade presentation

12. What To Avoid

NEVER use:

- neon biotech aesthetics
 - bright green dashboards
 - crypto/Web3 visual language
 - excessive gradients
 - glassmorphism
 - hard shadows
 - gamified scoring
 - "AI futuristic" visuals
 - noisy data density
 - ecommerce urgency
-

13. The Correct Emotional Output

When users browse PolarHerb, they should feel:

"This is a serious botanical intelligence infrastructure."

AND simultaneously:

"These herbs feel rare, ancient, biological, and difficult to access."

That duality is the core of the entire UI/UX system.
